Mapping for Results

Information available,
but not easy to visualize

Geo-coding: makes
project data more
accessible

Visualize project
locations and MDGs at
country level

Main Objectives

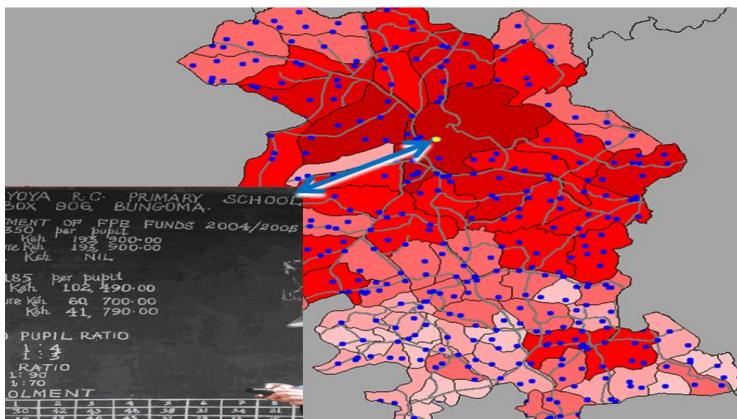

- **Enhance Monitoring of Results:** to better monitor, track and report results
- **Improve targeting of WB Operations:** to address MDGs
- **Improve Transparency and Social Accountability:** to increase accessibility to WB operations and their outcomes
- **Establish Feedback Loop:** to empower citizens and CSOs to provide direct feedback on development outcomes

Mapping at Various Levels

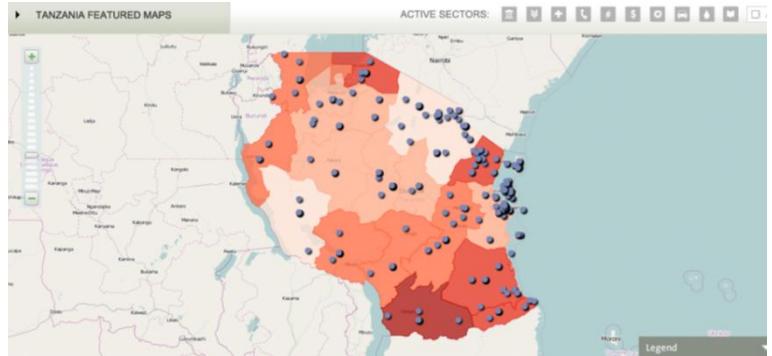

Regions

Sectors

Countries

Projects

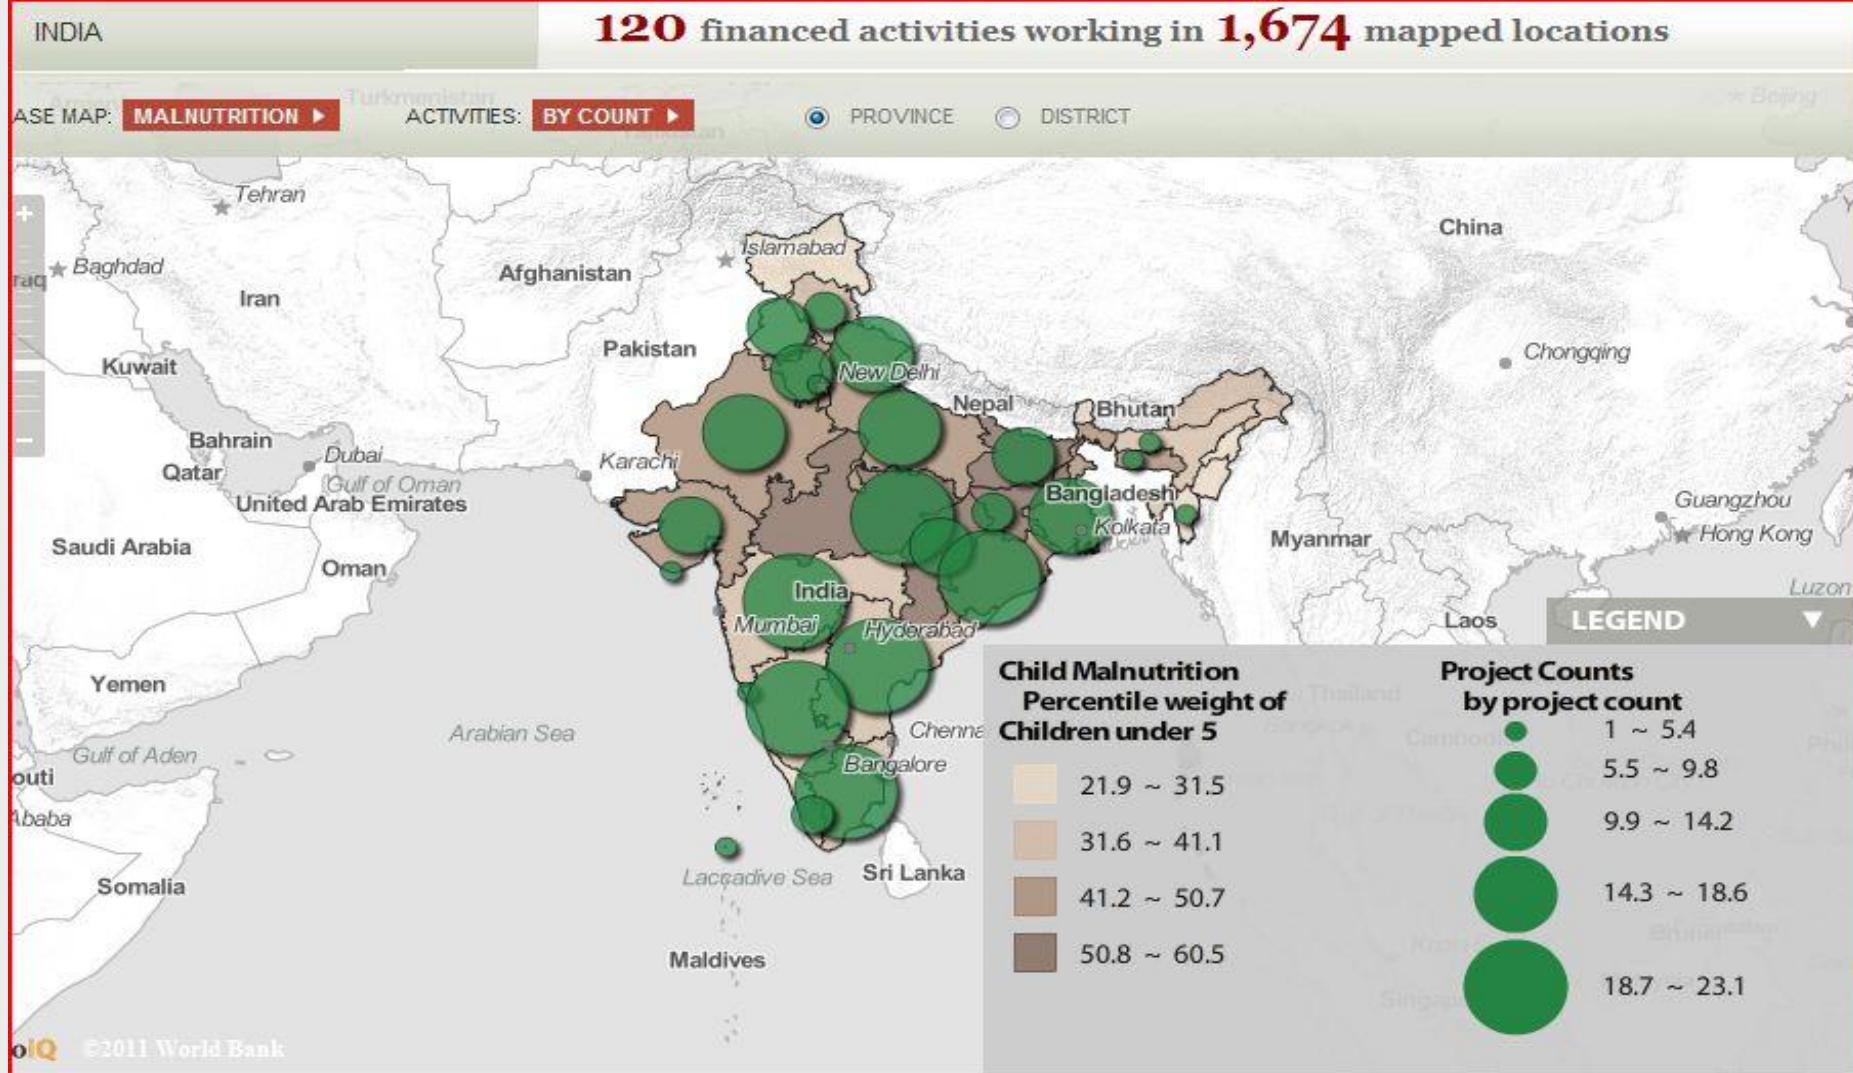

Progress so far

- Maps for all **143 IBRD and IDA countries** developed
- More than **30,000 project locations** mapped combined with **sub-national MDG indicators** (poverty, infant mortality, malnutrition)
- Visualized geographic locations for **2,500 active Bank projects**
- Provided **quick graphic overview** of how the WB is doing in terms of reaching its development objectives
- Initiated **Open Aid Pilots** for Malawi, Moldova and Haiti

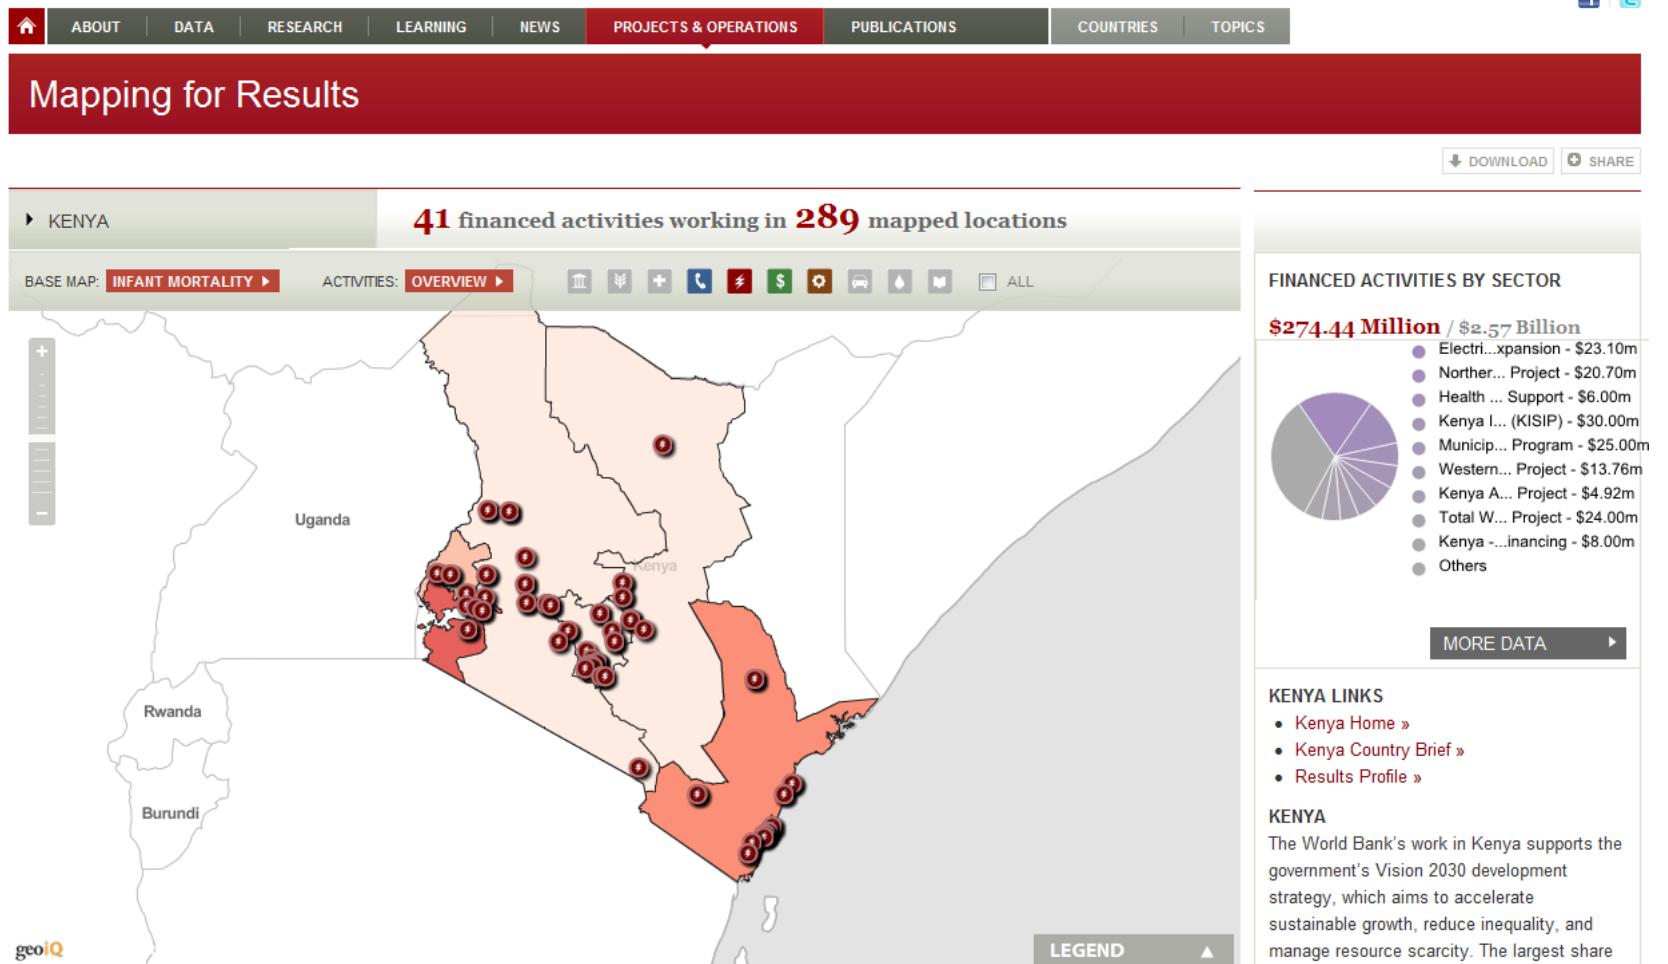

Challenges

- **Institutional culture change** towards transparency & openness needed
- **Cross-WB collaboration required** (OPCS, DEC, EXT, ISG, WBI and the Regions)
- Limited access to **sub-national data**
- Scale-up from **innovation pilot** to global coverage
- **Geo-coding** considered **too complicated & expensive**
- **Small core team** (limited budget)
- **Institutionalize geo-coding** across WB
- Long- term **sustainability**

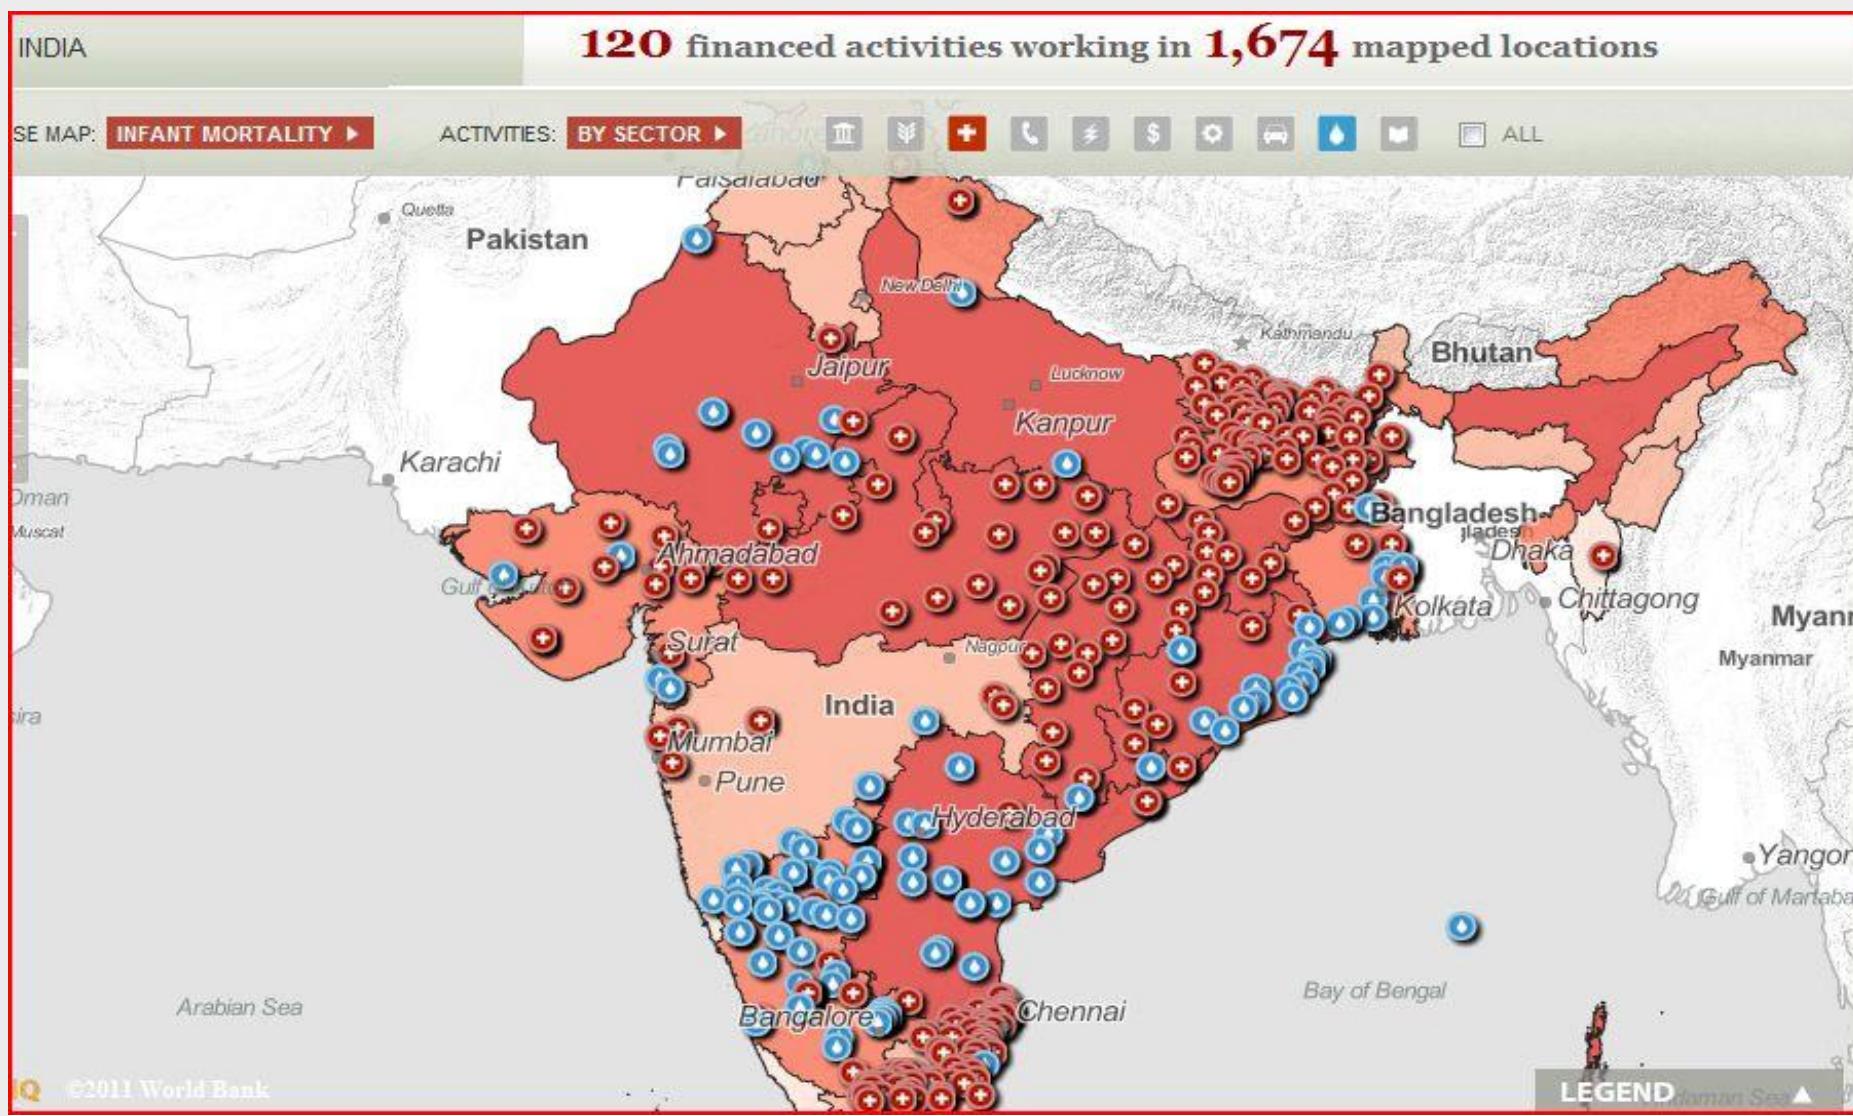

Where does the WB target its operations?

Are health projects in areas with the highest infant mortality?

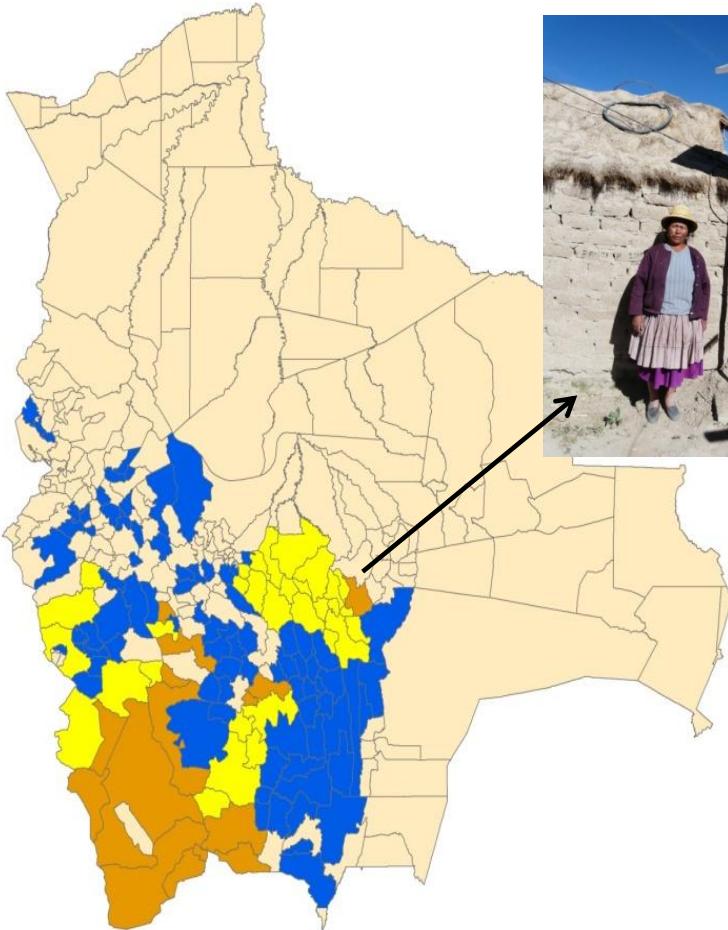

Multi-Sectorial Analysis

Project Level

Bolivia: Decentralized Infrastructure for Rural Transformation

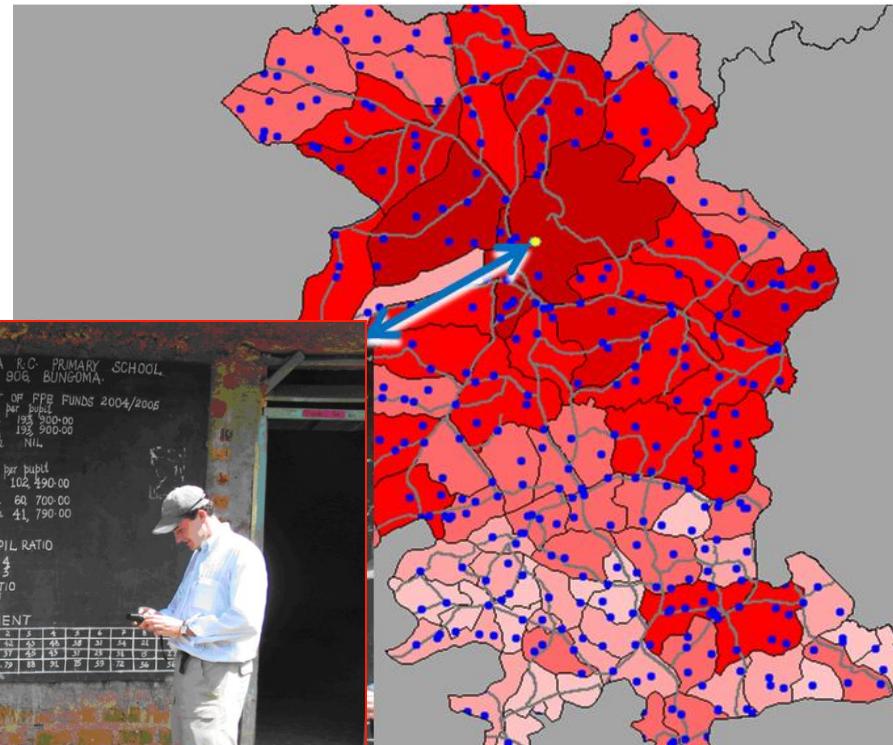

Project Benefits

- Target activities to regions with most need
- Promote synergies between components (Electrification and Telecomms)
- Verify that services were provided
- Monitor project results and impact
- Transparency and social accountability

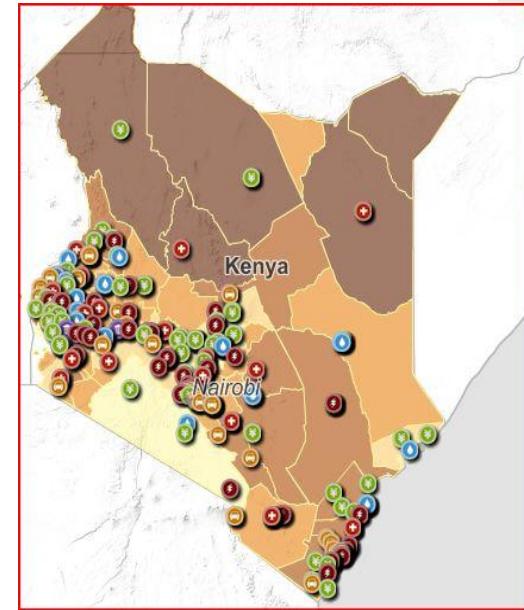

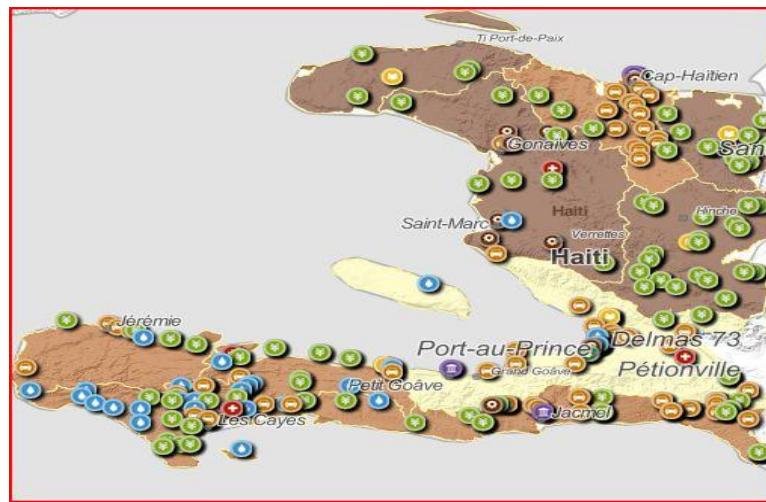

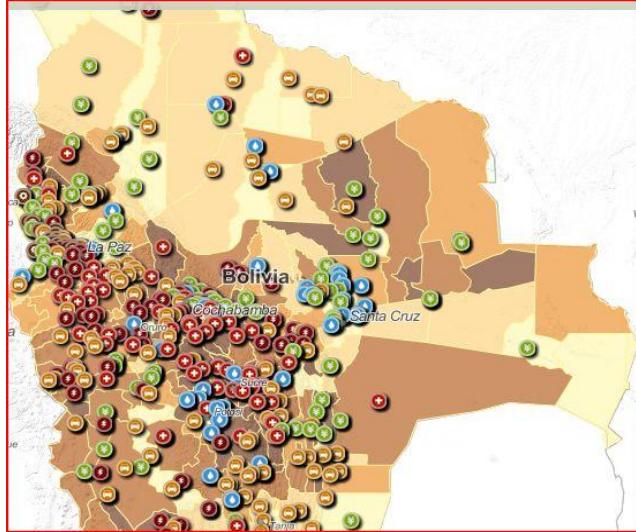

Local Open Data is Key

Better targeting of schools based on needs

Legend

Success Factors

- Experience from **previous failure**
- **External Partnerships** (DG, AidData, Universities)
- Strong **Senior Management Support**
- **Unconventional Implementation** (Interns)
- Early **regional buy-in** (AFR, LCR)
- **Highly committed and motivated team**
- Great support from peers
- Perseverance and
- Stars aligned

Open Aid Partnership

- **Open Aid Map** to show locations of donor activities
- **Country Platforms** for open geographic data of public service delivery
- **Citizen Feedback Loop**
- **Capacity Building** for civil society and citizens

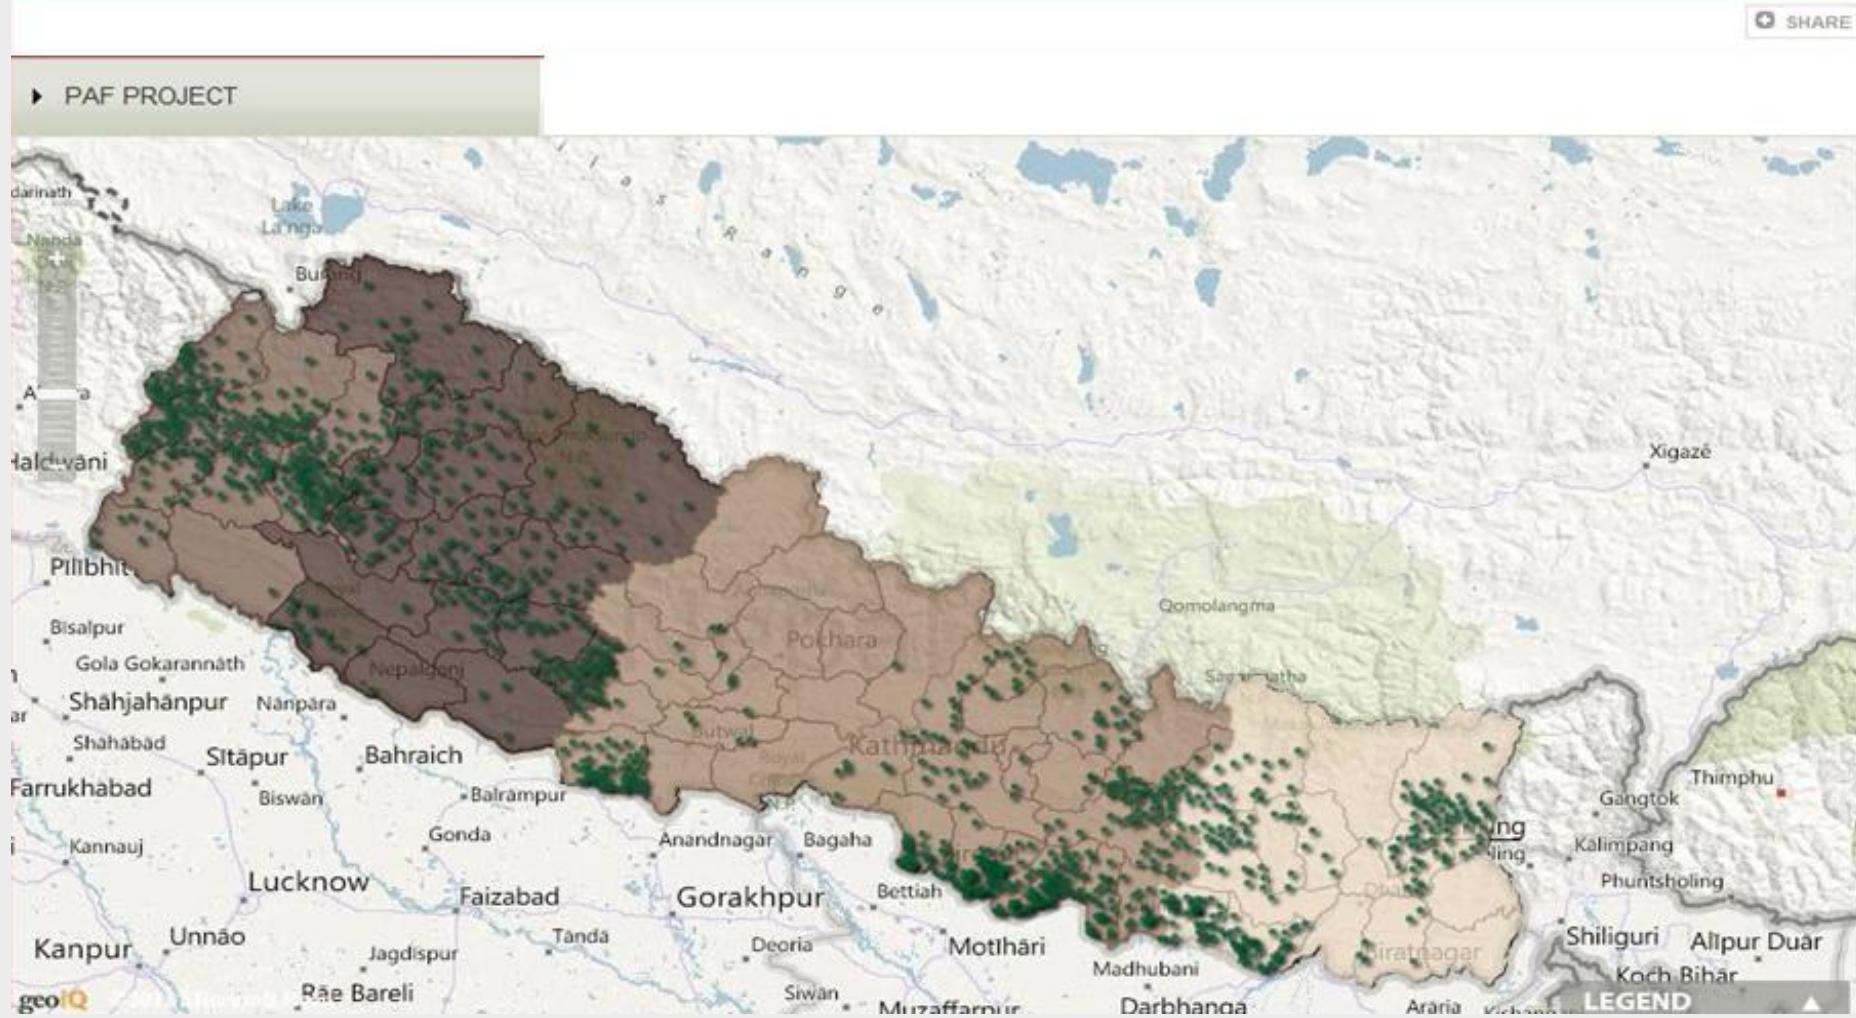

Key Components of Partnership

- **Open Aid Map** a common platform to show locations of donor programs
- **Country Platforms** for open aid flows and public expenditures
- **Citizen Feedback Loops** to promote citizen engagement in the delivery of public services
- **Capacity Development** to empower CSOs and Citizens to effectively use and generate data
- **Impact Evaluations** to assess the impact of open aid on development outcomes
